

ENDAXI LITE

A compact, standalone solution for fast, reliable aviation headset testing – identifying faults before equipment reaches operational teams.

COMPREHENSIVE AUDIO TESTING

Test microphone, speaker and individual left/right channels separately for fast, accurate fault identification.

INSTANT VISUAL FEEDBACK

LED level indication provides clear, objective audio feedback.

NO ADDITIONAL EQUIPMENT

No PC, software or aircraft connection required. Simply connect to mains power and test.

BUILT FOR THE WORKPLACE

Compact, robust and easy to move between offices, workshops, stores and maintenance environments.
